DETAILED ACTION

Claim Rejections - 35 USC § 103

The previous 103(a) rejection of claims 1-17, in the office action mailed April 17, 2006 has been withdrawn. At the present, a restriction requirement is deemed necessary, and as such, no new rejection has been presented at this time.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, drawn to frozen aerated product, classified in class 426, subclass 565.
- II. Claims 6-17, drawn to a method of making a frozen aerated product, classified in class 426, subclass 524.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process; the product as claimed does not require the limitations of the method claims (i.e. adjusting the pH of the composition above the isoelectric point of a protein, creating a premix, ect); the product, as claimed can be made without the required limitations of the claimed method.

Because these inventions are independent or distinct for the reasons given above and there would be a burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification and a different field of search, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

Art Unit: 1761

requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kelly Mahafkey whose telephone number is (571) 272-2739. The examiner can normally be reached on Monday through Friday 8am-4:30pm.
